Get Into The Driver's Seat

Know exactly what, when and where changes are made in your environments.

Automate monitoring and notifications to avoid misuse or unwanted actions in your JIRA and Bitbucket environments.

Great for compliance & auditing.

JIRA & Bitbucket Use Cases

- Create a state of the art configuration change process based on the actual environment configuration.
- Find inactive projects, issue types, pull requests, branches, etc.
- Alerts on anything, e.g. license expiry dates and pull request inactivity.
- For compliance, find out when a user was added and removed from accessing a specific project.

And so much more...
